Software Engineer with 5 years of experience as a System Administrator. Knowledgeable in wide range of development languages and methodologies, recently attended a 1-year intensive Full-stack Web development training to learn modern web programming. Eager to contribute to team success through hard work and cooperation, combining experiences as System Administrator and Development to deliver solution-oriented approaches.

Work History

2020-01 - Current

Web Development Tutor

DCI - DIGITAL CAREER INSTITUTE, Berlin, Germany

- Tutored over 15 students using React, Node.js, JavaScript, CSS, SASS, and other technologies from MERN Stack, such as express and MongoDB
- Taught students best code structuring and coding practices using design patterns such as MVC and FLUX
- Instructed how to debug using tools like Inspect and React Developer Tools
- Planned lessons and prepared learning modules for tutoring sessions according to students' needs and goals

2017-09 - 2019-10

Social Media Analyst

ARVATO - BERTELSMANN, Berlin, Germany

- Investigated and solved 200 customer queries daily, solving 98% successfully
- Monitored sensitive subjects on social media in relation to company or industry and alerted policy coordinator and corporate team in event of crisis
- Frequently attended educational training to improve knowledge and performance levels, having concluded more than 20 online courses

2014-02 - 2016-12

Systems Administrator

SONTAG COMMERCIAL AUTOMATION, SOLEDADE, Brazil

- Automated daily routines by developing scripts using technologies such as JavaScript, PHP, Lua, Shell Script, and SQL
- Designed performant, maintainable, and scalable servers and services using open sources solutions, reducing costs up to 50%
- Standardized job tasks and trained junior team members on industry best practices and standards
- Conducted testing and troubleshooting for various software remotely and onsite for 100 server sets to maintain operational readiness

2012-01 - 2013-11

Systems Administrator

SMO INTERNET PROVIDER, Sao Miguel do Oeste, Brazil

- Worked jointly with clients to create servers and clouds (VMWARE/ AWS) delivering solutions according to needs
- Proposed complete replacement of paid software by Open-source solutions, generating savings up to 20% in operating costs
- Monitored networks and network devices to resolve technical problems quickly
- Maintained flexible schedule and responded to after-hours and weekend emergencies

Education

2019-09 - Current
